

# AllyDVM: Second Monitor Request

**Why do I need a second monitor?** We recommend having two monitors so your staff can easily access the PIMs and AllyDVM throughout the day. This recommendation is *optional* and will be paid for by your hospital.

**How do I order new equipment?** You can purchase a monitor directly from any online or store-front retailer. You can also submit an IT ticket to have the monitor sourced & shipped to your hospital.

## What equipment should I order?

NVA IT recommends 3 options for you to choose from. Each of these monitors support a “HDMI” or “Display Port” connection. These are the 2 connections that our NVA standard workstations can support.

If you have an older machine or a non-NVA workstation, please reach out to the NVA HelpDesk.

## Recommended Monitor Options:

- 1) Dell 24" LED Monitor  
Color: Black (E2420H)  
Price: \$135
- 2) ViewSonic VA2446mh-LED 24" LED Monitor  
Color: Black  
Price: \$110
- 3) LG 24BK430H-B 24" LED LCD Monitor, 1920 x 1080 Full HD (1080p)  
Color: Black  
Price: \$128

## Cables: *(select one, depending on how you would like to connect)*

- 1) Tripp Lite P569-003 3' HDMI Audio/Video Cable, Black (HDMI to HDMI)
- 2) C2G 54401 6' DisplayPort Cable, Black (Display Port to Display Port)

# AllyDVM: Second Monitor Request

## Cable Connections:

Most standard NVA workstations have 2 connection ports. Prior to purchasing a monitor, verify your workstation has 1 or both of these ports.

HDMI

DisplayPort

## Install New Monitor:

- 1) Unbox and setup new monitor next to existing monitor(s)
- 2) Connect the HDMI or Display Port Cable from the new monitor to the back of existing monitor

**TIP:** you may have to open port door on existing monitor by pressing red latch

# AllyDVM: Second Monitor Request

**TIP:** top arrow is Display Port, bottom arrow is HDMI port

4) Plug in new monitor power supply

5) Configure monitor display settings by going to *Settings > System > Display*

If you need support, please contact the NVA HelpDesk.
